IT Business Analyst & Data Analytics | NBCC Apr 2026 | Azure Certified (AZ-900 · DP-900 · AI-900) | Python, SQL, Power BI, Tableau | NB Graduate Stream Eligible

Saint John, New Brunswick, Canada

Summary

I'm a cloud-certified IT professional and web developer with 7+ years of hands-on experience across full-stack web development, cloud platforms, data analytics, SEO, and digital marketing. I'm completing a Postgraduate Diploma in IT Business and Advanced Analytics at NBCC (New Brunswick Community College), graduating April 2026.

Cloud & Certifications

I hold 5 industry certifications spanning Microsoft Azure (AZ-900, DP-900, AI-900), IBM Cloud Essentials, and Google Cloud (Cloud Ready Facilitator + Digital Marketing Fundamentals). I've completed Microsoft's AI Classroom Series and Google's 30 Days of Cloud program.

Web Development

Building and deploying web applications since 2018. Proficient in PHP, Python, Django, HTML5, CSS3, JavaScript, WordPress, Node.js, and REST APIs. I've delivered freelance projects for 7+ years and completed a co-op Web Development diploma at Tamwood Careers College.

Data & Analytics

Advanced skills in SQL, Python (Pandas, Matplotlib, Seaborn), Tableau, Excel-based analytics, and cloud-based data pipelines aligned with my NBCC advanced analytics curriculum.

Digital Marketing & SEO

Certified in Google Digital Marketing Fundamentals (Google Digital Garage). Experienced in SEO strategy, content architecture, keyword research, and organic growth.

What I bring to Canadian IT teams:

→ Cloud: Azure · GCP · AWS · IBM Cloud (certified)

- Web: PHP · Python · Django · WordPress · Node.js
- Data: SQL · Tableau · Python analytics stack
- Marketing: SEO · Content Strategy · Google Analytics
- Academic: 8.34 CGPA / 3.4 GPA (GTU Engineering)

Based in Saint John, NB — open to full-time IT roles across Canada (remote or hybrid).

Currently completing applied analytics projects in telecom churn analysis, Airbnb data intelligence, and U.S. federal financial data with full project lifecycle experience from raw data to executive presentation. Open to full-time IT Business Analyst and Data Analyst roles in New Brunswick. Eligible for NB Graduate Stream (NBPNP).

Experience

NBCC (New Brunswick Community College)

U.S. SBA 504 Loan Program Analysis – Machine Learning & Financial Data Analytics

January 2026 - Present (5 months)

Saint John, New Brunswick, Canada

Currently leading a full-lifecycle data analytics and machine learning project using the U.S. Small Business Administration's (SBA) 504 loan dataset a large open government dataset covering FY2010 to present (500,000+ records).

Managing every phase of the project independently: dataset acquisition, data description documentation, pre-proposal, formal research proposal, exploratory analysis, machine learning model development, statistical analysis, and final report submission.

Applying supervised ML techniques in Python to identify lending patterns, predict loan outcomes, and assess regional economic impact of the SBA 504 program.

Final deliverable includes a comprehensive research report and stakeholder presentation demonstrating full project management capability from raw data to business insight.

Walmart

Receiving Associate

October 2024 - Present (1 year 8 months)

Saint John, New Brunswick, Canada

Logistics and inventory management role at a high-volume retail location while completing postgraduate IT studies. Developed skills in inventory systems, supply chain coordination, and team collaboration in a fast-paced Canadian workplace.

Freelance

Web Application Developer

August 2018 - Present (7 years 10 months)

Independently designed, developed, and deployed web applications for clients across multiple industries over 7+ years. Full ownership of projects from requirements gathering through delivery.

Key contributions:

- Built SEO-optimized websites using PHP, WordPress, HTML5, CSS3, JavaScript, and Node.js
- Developed REST API integrations and backend logic with Python/Django and PHP
- Managed hosting, deployment pipelines, domain configuration, and performance optimization
- Delivered digital marketing and SEO strategy alongside technical builds — keyword research, content architecture, Google Analytics setup
- Maintained long-term client relationships with ongoing support and feature development

Tools: PHP · Python · Django · WordPress · Node.js · MySQL · HTML5 · CSS3 · JavaScript · Git · Google Analytics · SEO

NBCC (New Brunswick Community College)

Airbnb Dataset Analysis – Data Cleaning, Normalization & Power BI Dashboard

September 2025 - September 2025 (1 month)

Saint John, New Brunswick, Canada

Conducted an end-to-end data analytics project using the Airbnb public dataset, with a focus on data quality, transformation, and business intelligence visualization.

Performed comprehensive data cleaning, normalization, and feature transformation in Python (Pandas) to prepare a large, messy real-world dataset for analysis.

Designed and built interactive Power BI dashboards visualizing listing trends, pricing patterns, host performance, and occupancy rates by geographic region enabling business insight discovery from raw data.

Presented findings and methodology to instructors and classmates, demonstrating both technical rigour and the ability to communicate data insights to non-technical audiences.

NBCC (New Brunswick Community College)

Telecom Customer Churn Analysis – Airtel, BSNL, Vodafone & Reliance Jio

September 2024 - April 2025 (8 months)

Saint John, New Brunswick, Canada

Led a research-based data analytics project investigating customer churn behaviour across four major Indian telecom networks: Airtel, BSNL, Vodafone, and Reliance Jio.

Defined the core business problem why customers switch providers and built a data analysis pipeline in Python (Pandas, Matplotlib, Seaborn) to identify key churn drivers including pricing sensitivity, network quality, and customer service gaps.

Applied statistical analysis and exploratory data analysis (EDA) techniques to quantify churn risk by customer segment, and translated findings into actionable retention strategy recommendations.

Delivered a formal written report and class presentation covering methodology, findings, and business impact.

Technomax Solutions

Full stack web development

January 2024 - August 2024 (8 months)

Ontario, Canada

Worked as a full stack developer building and maintaining web applications for clients in Ontario, Canada.

Key contributions:

- Developed and maintained full-stack web applications using PHP, JavaScript, HTML5, CSS3, and MySQL
- Collaborated with cross-functional teams following Agile/SDLC methodologies
- Integrated third-party APIs and cloud services into client web platforms
- Optimized application performance and resolved front-end and back-end issues

· Gained professional experience in a Canadian tech environment

Tools: PHP · JavaScript · HTML5 · CSS3 · MySQL · Git · REST APIs · Azure
